ABOUT US

(High Quality Components, High Quality Workmanship, Excellent Service)

POWER CONTROLS LTD. is a private limited company, which was founded in 1982, wholly owned by its two working directors. Like most such companies, it is quite dependent upon its very well experienced directors in all active areas, in the use and application of Industrial Electrical and Electronic equipment across a very broad industrial spectrum.

During the company's existence, it has been continuously involved in the expansion of its services to the industry. From contracting and installation, manufacture of industrial panels with state-of-the-art design technologies, to sales of imported components and equipment from all over the world, which are now widely accepted by customers, all over Kenya and East Africa. We also carry out repairs of all electrical and industrial electronic equipment and machines in our well-equipped testing workshops, supported by a very effective team.

Over the years, the Company has gained a reputation for supplying good quality products and good customer service, which has been made possible by the development of good practices and conscientiousness of both Sales and Production staff.

The Directors and staff constantly review working practices and any change found necessary is implemented. By this means, the Company is able to maintain and improve performance, quality and service. We have people in place to help you with almost any application you can imagine.

"CLASS A1" Industrial Electrical Contractors for Industrial Installations & Maintenance for Plastics, Steel, Flour, IT, Paper & Food Industries & High rise buildings.

Quality Policy

Power Controls Ltd. for over 35 years has established itself as a premier provider of Electrical Turnkey Solutions and applies a Quality System for Design Manufacturing of Electrical Switchboards & Control Panels, Electrical Installations, Industrial Electronic Repairs & Maintenance. Being a leadership force at all levels of project design, development, management, installation and commissioning, we shall thrive to maintain leadership.

SALES

We offer over 25,000 products from our warehouse along Enterprise Road, Industrial area, Nairobi. You can also visit our website, www.powercontrols.co.ke to browse the products and place your orders online.

FRIENDLY SERVICE

Our technical & experienced customer service representatives are pleased to process your orders and handle your queries.

NO MINIMUM ORDER VALUE

You can order whatever you require from our website since there is no minimum order value

MAJOR INTERNATIONAL BRANDS

The highest quality products from leading international manufacturers. With over 25,000 products from over 20 suppliers. That's what makes Power Controls unique.

VALUE FOR MONEY

Power Controls Ltd. Continues to provide the very best value for money with 100 best value products and the following price offers:

Volume pricing: If you are looking for a quantity that exceeds our highest price break, our volume-pricing group will be pleased to give you a quotation.

Mixed quantity pricing: You can save money even on small quantity orders. Our mixed quantity pricing service means that you save money on selected items.

Schedules: we can help you plan your stock requirements to avoid lengthy equipment breakdowns or production line shortages. Your stock will be reserved for 7 days and you will be invoiced per delivery

AUTHORISED PARTNERS

OUR BRANDS

We are agents of various high-quality products from leading international manufacturers.

LEGRAND: One of the largest Manufacturers and Distributors of High Quality Domestic & Industrial Electrical products and accessories from France. We have been distributing these products in the East African region and now have huge stocks of their products and all other related accessories at our warehouse. MCB's, MCCB's, ACB's, Timers, Relays, Switches, Sockets, Enclosures are among some of the stocked items.

GHISALBA: Is a well-known Italian company manufacturing a full range of products suitable for starting, stop, control, protection of electric motors and switching of power factor capacitors. We are the sole distributors for Ghisalba in East Africa. The main imported components are Contactors, Overload relays and Manual starters, Soft starters for motors.

LIFASA: We distribute and install motor starting and running capacitors, cylindrical & rectangular power factor correction capacitors, Digital P.F regulators, Power Analyzers and A.C drives

RIELLO: Suppliers of high quality domestic & Industrial online double conversion UPS systems from 5kVA – 3000 kVA with battery backup for servers, machines etc

FOX TAM:

Foxtam Controls is a specialist supplier of low voltage control and instrumentation products to the electrical control panel and switchboard industry all over the world. Phase failures, liquid level, phase reversal, gen start attempt, timers, relays, etc

TELERGON:

Isolators, Fuse Switches, Change-over switches, Star-delta switches, Forward-Reverse Switches, Multi-step switches, By-pass switches, Voltmeter /Ammeter Selector switches, etc

ELSPEC:

The EQUALIZER is the world's fastest real-time power quality enhancement system that optimizes all power quality factors and more, for a variety of dynamic fast changing balanced, unbalanced & single phase loads. The EQUALIZER features electronic switching of 5-20 Milliseconds @ 50 Hz, transient-free switching, voltage support, harmonic filtration, flicker & current spike reduction. Europe-based Elspec's products include power quality meters, power quality analyzers, Digital Fault Recorders.

LEGA:

LEGA Energy, is a young, dynamic and innovative company that established to operate through high quality service in the field of Industrial Power Solutions (Regulator, Renewable Energy). We are suppliers of their automatic voltage regulators / stabilizers.

CABLOFIL:

High quality wire mesh cable trays either stainless steel or hot dip galvanized for cable management solutions. Ready with all accessories for easy installation. Widely used all over the world for heavy, light or internet cabling.

OUR CORE SERVICES

Power back up systems:

Generator installations with AMF panels for Large Power consumers have been carried out successfully in various Industries.

With the support of outback engineering products, we have done numerous installations of power inverters and UPS systems in various buildings and for Internet Service Providers in helping keep their data safe and customers online with power failures for several hours.

Modernizing Control Panels:

We are always updated with the latest trends & products in the evolving Electrical & Electronic technology and therefore are able to convert old electrical panels to more compact, efficient & maintenance free systems so that the Industry does not suffer down times due to the high maintenance of old & phased out electrical Equipment.

Electrical Installations:

Numerous installations in most plastic, textile, paper, flour, wood, chemical & steel engineering industries in East Africa have been carried out by us hence you are assured of the complete electrical installation. All-in-one service to our customers, we believe, is our strength and it is very cost-effective.

Conversion of machines from D.C. drives to A.C. drives:

D.C. drives are being phased out due to their high maintenance costs and inefficiency and being replaced with A.C. motors and drives which are readily available off the shelf for installation in industry.

OUR CORE SERVICES

Energy survey:

We help you in making the right decisions when carrying out installations by surveying the sources of losses of energy in your industry to make sure that your electricity bills are cut down.

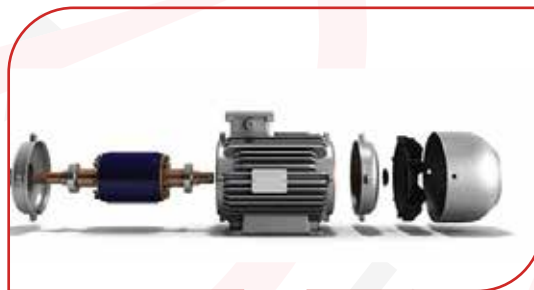

PCB Repairs:

Our well-equipped Electronics Workshop can cater for repairs of any of your PCBs or electronic components by our well trained Industrial Electronic Engineers.

Maintenance:

Any emergency electrical breakdowns related to your Power or Machinery that may arise can be sorted out by our specialized team of well experienced Electrical technicians & engineers who could come to the rescue immediately.

Motor rewinding:

Over 20 years' experience in rewinding of A.C. and D.C. motors give us a leeway over competitors in making sure that the job is properly done and tested using our equipment.

Delivery of material to your doorstep on time:

This part of our service comprises of a team, for deliveries within Nairobi, Kenya, of motorcycles, pick-ups and vans to ensure that any size of goods that have been ordered reach you on time with all the correct documentation. We are just a phone call away.

INDUSTRIAL SOLUTIONS

Medium Voltage Equipment Supply and Installation:

We carry out medium voltage installations for 11 kV voltage with Ring Main Units, including commissioning, including 11kV cabling & termination or jointing kits

Transformers:

Green high efficiency Legrand transformers Cast Resin dry type complete with enclosure. The new transformers are energy efficient, easy to install, compact in size and simple to maintain with no oil leaks etc

Meter Boards:

Manufacture and supply of several meter boards has been carried out for huge housing estate projects at very special prices. This includes but not limited to supply of automatic or manual change over contactor circuits with submeters, cut outs, lockable compartments.

Electrical Panel Building:

Our in-house production line for building of electrical control panels & switchboards using high technology products at a very low price makes us the preferred Switchboard & Control Panel supplier for most industries. With modern technology machines, we produce very reliable & good quality products manufactured to stringent standards approved by the Kenya Bureau of Standards where necessary. The panels are spray painted and then baked in an oven to achieve a remarkable & long-lasting finish, making our products affordable to the consumer.

Power Factor Correction Bank:

As per the Kenya Power & Lighting Co. Rules, industries are required to operate at a minimum power factor of 0.90 lagging otherwise a low power factor surcharge would appear on your electricity bill. We build power factor correction Capacitor banks using all European tried and tested equipment to make sure that under no circumstances would you have any problems with Power Factor Correction in your industry.

Distribution & Switchboard Assembly:

The Legrand Group of France, from the year 2006, have appointed us the local agents for the assembly of imported XL3 cabinets from 63A up to 4000A, which are manufactured up to IP65 (waterproof & dustproof) ratings hence can be used in severe atmospheric conditions especially in industries and remote areas. They are also very suitable for Mobile Service providers for their BTS sites in remote areas.

Battery Cabinets:

Several heavy-duty battery cabinets are now on site for stacking of large batteries for Power back up systems like Inverters & UPS's. These are either locally fabricated or imported from Italy complete with batteries.

Voltage stabilizers and UPS installation:

We supply and install, AVR Stabilizers, UPS's from Italy. These range from 5kVA up to 3000 kVA in both oil cooled and air cooled complete with short circuit, overload, overvoltage, surge protection, bypass etc
